

interface of the two layers. The inner layer can be made from almost any material, for example, cellular plastic, as it is mainly intended as a base for the formation of the outer layer. Naturally, the inner layer may even be a metal tube. Any reinforcement known to the art, such as glass or other fibres, fabric, netting or similar can be added to the layers to reinforce them. As stated above, there may be several layers, when their materials and manners of manufacture may vary according to the prevailing requirements.

IN THE CLAIMS:

Please amend existing claim 3 with replacement claim as follows:

3. A post according to Claim 1, characterized in that at least one lead ends are connected to one or more connectors, at least in a lower section of the post.

ATTACHMENT:

Attached hereto is a marked-up version of the changes made to the Claims and Abstract by the current amendment. The attachment is captioned "Version With Markings to Show Changes Made."
